The following is an examiner's statement of reasons for allowance: upon reconsideration, the Examiner believes that claims 1 and 6 are allowable over Blumenthal because both claims require that the calibration signal is compared with the output of the amplifier and the output indicates a deviation of the gain of the amplifier from a desired gain. (Note that in claim 6 the reference signal is output by the amplifier). The comparator 312 of Blumenthal differs from this as noted in the first Office action in that the output of the amplifier (304) is compared with the output of another amplifier (354). So even though the other amplifier receives an attenuated version of the calibration signal (VBIST) in a self test mode the output of the comparison would not result in a signal indicative of the deviation of the gain of the amplifier 304 from a desired value.

The drawings filed April 7, 2004 are acceptable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
